Team Onboarding Handbook

Retail Data Engineering – Offshore + Onshore Team Setup Guide

1. Company Mission & Vision

Our mission is to deliver world-class retail analytics and data automation using AWS + Snowflake + dbt. Our vision is to become Australia's #1 retail analytics platform.

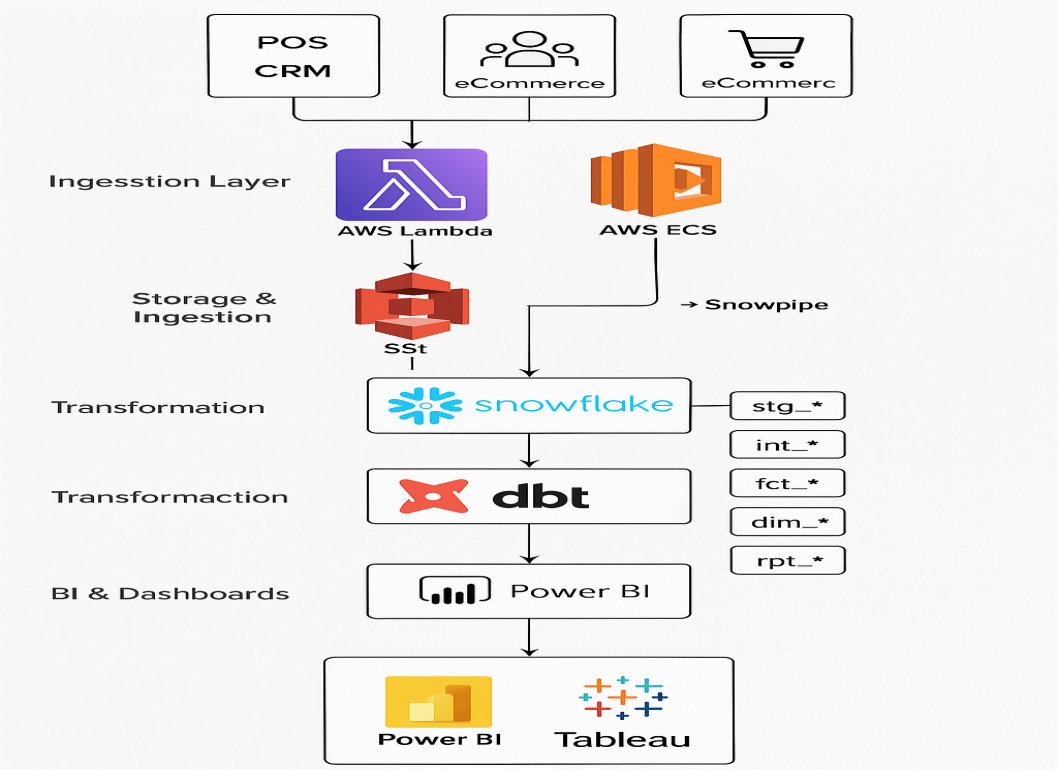

2. Team Structure & Responsibilities

Onshore Lead (Australia):

- Architecture & solution design
- Data model approval
- dbt code review & standards enforcement
- Client communication & requirements
- Final QA before client delivery

Offshore Engineering Team (India):

- Build ingestion pipelines (Lambda/ECS)
- Develop dbt models
- Build dashboards (Power BI/Tableau)
- Run daily pipeline health checks
- Fix ingestion/dbt failures
- Documentation and mapping sheets

3. Development Standards

3.1 dbt Naming Conventions

• stg_* → cleaned raw tables
• int_* → intermediate joins
• fct_* → fact tables
• dim_* → dimension tables
• rpt_* → reporting tables

3.2 S3 Folder Structure

• raw/client/...
• staging/client/...
• curated/client/...

Raw zone is immutable; transformations only occur in Snowflake via dbt.

3.3 Git & Pull Request Rules

• Use feature branches for all tasks
• PRs must include description + screenshots + tests
• No direct commits to main
• Onshore lead approves PRs
• Always update dbt docs

4. Tools & Access Requirements

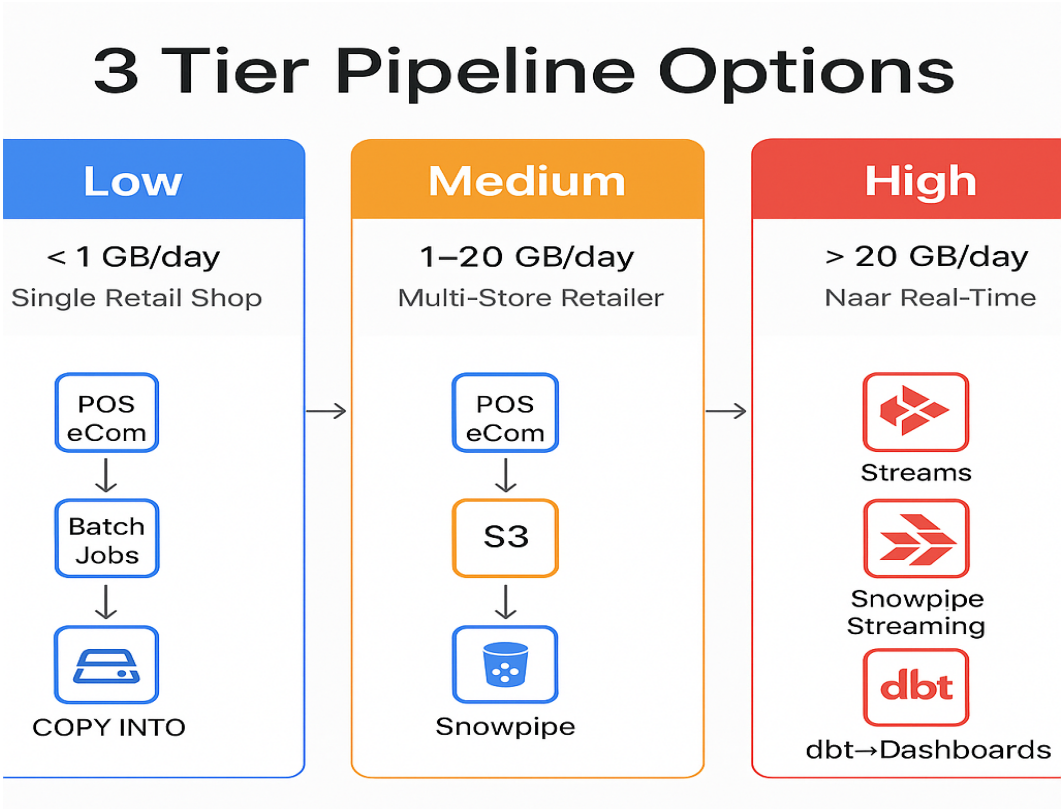

• AWS CLI + Console
• Snowflake UI + Worksheets
• dbt Core
• GitHub
• Power BI / Tableau
• VS Code
• Python 3.10+

5. Daily Operational Routine

• Review CloudWatch logs for failures
• Check Snowpipe load history
• Run dbt tests
• Validate dashboard freshness

• Log issues in Jira/Trello
• Document fixes

6. Client Tiers Overview (with Visual)

7. Communication Standards

• All tasks tracked in Jira/Trello
• Daily Slack/Teams update
• Weekly sync call with onshore lead
• Monthly retrospective

Always provide logs/screenshots when raising an issue.

8. Security Policies

• Never share AWS/Snowflake credentials
• Use IAM roles instead of static keys
• Rotate passwords every 60 days

- Do not store PII locally
- Follow least-privilege principles

9. Final Guidance

This handbook ensures aligned processes across onshore & offshore teams. All engineers must review this in their first 30 days.
